Home lifts becoming integral to **LUXURY HOMES**

Home lifts are increasingly popular in residential architecture and interior design. Their benefits, such as improved accessibility, convenience, luxury, future proofing, and adding value to a property, make them

attractive to homeowners looking to elevate their living experience.

Advances in innovation and design also make this an exciting time for architects looking for sleek and modern options...

ELEVATING DESIGNS

*Key trends shaping the
future of home lifts*

SLEEK AESTHETICS

Open-concept designs and transparent materials reflect the trend of home lifts enhancing property aesthetics.

INCREASED PERSONALISATION

Bespoke designs and finishes cater to individual preferences.

SAFETY FIRST

Smooth rides, non-slip flooring, handrails, emergency alarms, battery backups, and automatic door locks prioritise safety.

ENERGY EFFICIENCY

LED lighting, regenerative drive systems, and recyclable materials reduce environmental impact.

FUTURE INVESTMENT

Home lifts boost property value, future-proof accessibility, and are now essential rather than a luxury.

LOOKING AHEAD

Integration with home automation, eco-friendly materials, enhanced safety, compact designs, and quieter operations are the future.

At Terry Lifts, we recognise that every architectural project demands innovation, functionality, and a bespoke approach.

Our customisable home lifts not only enhance accessibility but also seamlessly integrate into any design, from making bold statements to optimising tight spaces.

With a compact footprint and quiet operation, our Affinity Home Lift is designed to fit even the most challenging spaces while maintaining the aesthetic integrity of your project. Choose from a range of finishes, door options, and lighting to align with your vision.

Supported by rigorous testing, our lifts ensure safety, reliability, and efficiency. From consultation to installation, our expert team works with you to bring your architectural vision to life, whether integrating accessibility into new builds or retrofitting existing spaces.

Making best use of **YOUR SPACE**

At Terry Lifts, we understand just how precious space is. Integrating home lifts into a new or existing floor plan while meeting your clients' specifications can be challenging.

That's why many of our designs have ultra-compact footprints, making them the ideal space-efficient solution for smaller homes with limited square footage.

Affinity
Technical
Information

Our **AFFINITY** *Home Lift*

- Ultra-compact design fits into 900mm wide enclosure
- Fully customisable options include - perch seat and choice of fabrics, interior and exterior paint options, illuminated stainless steel controls and powder-coated aluminium handrails
- Unobtrusive guide rails give full use of the room when the lift is parked at the other level (Ideal for smaller spaces, such as narrow alcoves or stairwells)
- The design's discreet rail guides can be fitted neatly against the wall, and its compact design enables easy installation without interfering too much with the room's layout.

Terry Lifts • THE ONE TO TRUST

We know the installation process involves careful planning and coordination between the lift company, architects, and builders.

Considerations such as the available space, the structural requirements, and any necessary building permits must be thoroughly addressed, as must choosing a reputable and experienced company to ensure safety and efficiency.

We've been designing and manufacturing lifts here in the UK for more than 70 years, meeting the highest standards in design, quality and safety. This means we can provide you with the perfect lift to fit your requirements, proudly designed and expertly manufactured in Britain.

Everything you'd expect and nothing less from the one you can trust.

Let's talk...

Whatever your lift requirements, you can rest assured our trusted team can help you choose the right solution for your next project.

Our office is open between 08.30 – 17.00 | Monday–Friday
